

## **PRESS RELEASE**

September 2024

### **Energiequelle GmbH at the WindEnergy in Hamburg**

**As a project developer, co-operation partner and employer, the international company is represented at the wind industry's leading trade fair**

Kallinchen, 17 September 2024: Energiequelle, international project developer, operations manager and provider of innovative energy supply solutions, will be exhibiting at WindEnergy. WindEnergy is the leading trade fair for the wind industry and takes place from 24 to 27 September in Hamburg. The focus of Energiequelle's presence at the trade fair will be on acquiring new projects and co-operations as well as addressing specialists.

#### **From vision to reality - innovative appearance in a new design**

In Hall A1 at Stand 232, the motto of this year's trade fair appearance is 'From vision to reality. Your partner for international wind & solar development'. This innovative approach is not only reflected in the stand design, but also in various stand activities. For example, the company is presenting its most successful reference project, the energy self-sufficient village of Feldheim, in a trade fair model. The model impressively demonstrates what Energiequelle has achieved in Feldheim together with the town, the agricultural cooperative and the residents: an innovative energy concept that was jointly developed and implemented by all those involved and has now become a showcase for the local energy transition all over the world.

Energiequelle would like to talk about projects like Feldheim, as well as project approaches at every stage, at the trade fair and is looking forward to exchanging ideas with new partners, investors and operators throughout Germany, Europe and beyond.

#### **Energiequelle as an attractive employer**

Energiequelle is also looking for new specialists for its full pipeline and continued growth. More than 100 new employees were hired last year and the company has entered three new national markets. In addition to Germany, France, Finland and Poland, Energiequelle has branches in Greece and South Africa

and is also active in Austria. In Germany alone, job seekers can advance their careers at 20 locations.

Michael Raschemann, founder and Managing Director of Energiequelle GmbH, is looking forward to many personal discussions at the stand: 'The industry get-together in Hamburg is always a good opportunity to present ourselves and our portfolio, meet partners and make new contacts in order to drive forward the expansion of renewable energies and develop future-oriented solutions together.'
